Vivid Photo
Clean One Page Portfolio Template

"**Vivid Photo**" is a **modern** and **elegant Photography Website Template**. It is **cross browser compatible** and created to suit needs of **photographers**. The template is made using **HTML5**, **jQuery** and **CSS3** with **cufon fonts**, **HTML5 Contact Form** and a lot more stuff for various functionalities. You are free to use it for your personal as well as commercial projects.

Release Page at http://www.priteshgupta.com/templates/vivid-photo/.

Adding Gallery Items
To add items to the gallery (bottom thumbnail strip) simply add an image with a syntax like **""** where **"images/album/1.jpg"** is the path of full size Image.
And **"images/album/thumbs/1.jpg"** is the path of the thumbnail, make sure the thumbnails are of the dimensions **180** x **120**. The first image will be loaded when the website is opened.

Fonts
The template uses the font **"Quicksand"**, which is available at **http://www.fontsquirrel.com/fonts/Quicksand.** To use another font, replace "**<script type="text/javascript" src="js-uncompressed/Quicksand_Book_400.font.js"></script>**" with your **cufon** font.
